

ONLINE HANGOUT TOOLS FOR WORKING WITH YOUNG PEOPLE ONLINE

30TH MARCH - 15:00 TO 16:30

Youthworkers! Join us for a chat focused on sharing ideas, tools, and resources for working with young people online during the Coronavirus crisis.

- Learn about the various platforms and software that can be used to help run virtual groups, as well as some things to think about.
- Join over computer (recommended), smartphone or telephone line by using the instructions below.

[New to online events? Don't worry - you'll pick it up!](#)

You can follow the joining instructions before the event starts to check your equipment (although you will only be able to get to the waiting room.) You can also watch a video about the software [here](#).

In general using a computer with a headset and microphone will give you the best experience. You may need to spend time getting your sound settings correct on your operating system.

If you are joining by computer you will have the choice to access through the browser or install software. Either option can be used - joining through the browser is useful if your organisation restricts what can be installed. You may then be asked if you want to join by phone audio or computer audio. Choosing computer audio is usually best, although you can also use phone audio and then dial in with your phone alongside this if you are having audio problems.

If these options don't work you can try joining through the zoom app on your smartphone, or simply calling the conference numbers in the joining instructions.
